ORDER :

OMM, LLC, :

Defendant. :
-----X

JESSE M. FURMAN, United States District Judge:

The Court received the attached document, styled as a motion to dismiss, signed by Mellina Soheili, Managing Partner of OMM, LLC. Corporate entities (including limited liability companies), however, may appear in federal court only through licensed counsel. *See, e.g., Lattanzio v. COMTA*, 481 F.3d 137, 140 (2d Cir. 2007). No counsel has appeared on behalf of Defendant, and Mellina Soheili does not appear to be a member of the bar of this Court. Accordingly, the Court will take no further action in response to the attached document.

As a courtesy, Defendant is granted a *nunc pro tunc* extension of its deadline to answer (which passed on July 26, 2022) to **August 29, 2022**. If, by that date, Defendant has not responded to the Complaint through a proper filing by counsel, default judgment may be entered against Defendant. *See, e.g., Grace v. Bank Leumi Tr. Co. of N.Y.*, 443 F.3d 180, 192 (2d Cir. 2006) (noting that where such an entity “repeatedly fails to appear by counsel, a default judgment may be entered against it” (internal quotation marks omitted)).

Finally, Defendant is cautioned that all filings by represented parties (which, for the reasons discussed, means all future filings by Defendant) must be made electronically via the Court’s Electronic Case Filing (“ECF”) system, with only limited exceptions. *See* Fed. R. Civ. P. 5(d)(3)(A).

As a courtesy, the Clerk of Court is directed to mail a copy of this Order to Melina Soheili at the address provided on page four of the attached document. Future orders of the Court will not be mailed to Defendant.

SO ORDERED.

Dated: August 3, 2022

OMM, LLC's MOTION TO DISMISS

1. In reply to the above complaint that was served to OMM LLC on Tuesday July 5, 2022, the OMM, LLC, respectfully motions the Court to dismiss this case based on the below stated facts and detailed explanation that addresses all the concerns of the plaintiff in this case.
2. OMM LLC is a Small Ethnic-Minority Woman Owned Business. OMM LLC was established in 2016. OMM has always been about "Love Yourself Again". The company is committed to Inclusiveness, Equity, Unisex, Love for ALL, Respect for Humanity, Taking care of Ourselves and Community. OMM LLC is a very sociably conscious and committed to rights for all. Its partners and employees are proud to represent and dedicate its calling to humanity and equality for all including individuals with limited accessibility. We are fully committed to this mandate and stand by it; From our working environment to providing employee benefits and treat customers including online customers with outmost respect and to make everyone welcomed

and be able to interact with OMM website with ease. The following is a summary of how we diligently worked to bring OMM alive after Covid pandemic and making sure we are in compliance with all the Local, State & Federal laws accordingly.

3. OMM is a Natural Thickening Hair & Therapeutic Spa Line. By end of 2018 we had created a 7 SKU Hair Line and 8 SKU Spa line all made in the USA. OMM does not have any physical stores. OMM marketing and sales concept was direct sales to Hair Salons, Spas, Stores, Distributors, and other Channels that have Brick and Mortar. In 2019, we entered the Market Place, with 2 partners and one part-time contractor. In 2019 we only had made \$67,261 in gross revenue and a net loss of \$38,551. Please see attached P&L statement for 2019 for OMM, LLC. At that time, we had a basic website of 2 pages with no E-Commerce platform. By Feb 2020, we had 2 part time employees only. In Feb 2020, before we could possibly begin to make sales, we were hit with Covid, where almost all the Hair Salons, Spas, Stores, and all distribution line that were Brick and Mortar closed and all our business came to Halt. It was a very devastating effort after major investment to see everything go to ashes. In 2020 our total gross sales were \$60,118 with a net loss of \$28,835 for the year. Please see attach P&L statement for 2020. By December 2021, most stores were still closed, or they were preparing to start again, we pushed almost all our online sales to Amazon and Macy's since we didn't have enough funds to build up the OMM's own website since we have been in financial crises and loss since we re-started operation! In 2021 our total gross sales (mostly from Amazon marketplace and Macy's marketplace) were \$123,708 with a net loss of \$83,411. Please see attached P&L statement for 2021.
4. By March 2022, we were able to receive a small funding from family to hire a couple employees, hoping we can get operational again and start our business over again, since our only sales was pushing sales thru Amazon and Macy's. To work with wholesalers, distributors and even brick & mortars Stores, we were forced to change/push everything to OMM website knowing that the current website was way too simple, we opted on going with Shopify, which allowed us to setup OMM Online Shop, and yet with minimal technical knowledge, we can stay in business, and finally operate OMM online website (www.ommcollection.com) in a

proper manner and stay compliant in all facets of financial, accounting, inventory control, sales perspectives report that was readily available thru Shopify. In 2022, thru April of 2022, our gross sales are \$35,500 with a net loss of \$167,961. Please see the attached P&L statement for 2022.

5. Please note that the total sales thru our own web site (ommcollection.com) from inception thru June of current year (2022) is a mere total of \$5,676, which is less than 2% of our total sales revenue. Please see the attached Web Site Sales data from Oct 2016 thru June of 2022.
6. As of May 31, 2022, when we upgraded our web site to Shopify hosting, we explicitly turned on the "Accessibility Menu" icon on all of our web pages, which is in addition to footer menu item of "Site Accessibility Statement" that was already available on all pages. See attached "OMM Collection Accessibility Statement" page as available on www.ommcollection.com.
7. Considering all the above facts, we truly believe that our web site, www.ommcollection.com is equally accessible to blind and visually impaired consumers. To prove this to ourselves, we used the web site scanning tool of the "accessibilitychecker.org" organization that scans web site for full compatibility with WCAG (Web Content Accessibility Guidelines) and ADA (Americans with Disability Act) and the official report shows "Fully Compliant", with a score of 95%, and based on WCAG 2.1 standards, we have 0 (0%) critical issues, passed 100% of required/mandatory items, and require no manual audits. Please see the attached Accessibility Audit Results for www.ommcollection.com, which has detailed reports showing OMM LLC's web site already complies with ALL the items in plaintiff's class action complaint.

WHEREFORE, in consideration of, OMM LLC, already being in full compliance with ADA and WCAG 2.1 standards, and all the above facts, OMM LLC, respectfully motions the Court to dismiss this case.

Respectfully submitted,

Mellina Soheili
Managing Partner

OMM, LLC

OMM Collection Accessibility Statement

General

OMM Collection strives to ensure that its services are accessible to people with disabilities. **OMM Collection** has invested a significant amount of resources to help ensure that its website is made easier to use and more accessible for people with disabilities, with the strong belief that website accessibility efforts assist all users and that every person has the right to live with dignity, equality, comfort and independence.

Accessibility on www.ommcollection.com

www.ommcollection.com makes UserWay's Web Accessibility Widget available which is powered by a dedicated accessibility server. The software allows **www.ommcollection.com** to improve its compliance with the Web Content Accessibility Guidelines (WCAG 2.1).

Enabling the Accessibility Menu

The **www.ommcollection.com** accessibility menu can be enabled by clicking the accessibility menu icon that appears on the corner of the page. After triggering the accessibility menu, please wait a moment for the accessibility menu to load in its entirety.

Disclaimer

OMM Collection continues its efforts to constantly improve the accessibility of its site and services in the belief that it is our collective moral obligation to allow seamless, accessible and unhindered use also for those of us with disabilities.

In an ongoing effort to continually improve and remediate accessibility issues, we also regularly

scan **www.ommcollection.com** with UserWay's Accessibility Scanner to identify and fix every possible accessibility barrier on our site. Despite our efforts to make all pages and content on **www.ommcollection.com** fully accessible, some content may not have yet been fully adapted to the strictest accessibility standards. This may be a result of not having found or identified the most appropriate technological solution.

Here For You

If you are experiencing difficulty with any content on **www.ommcollection.com** or require assistance with any part of our site, please contact us during normal business hours as detailed below and we will be happy to assist.

Contact Us

If you wish to report an accessibility issue, have any questions or need assistance, please contact **OMM Collection** Customer Support as follows:

Email: info@ommcollection.com

Phone: 877-588-6669

Passed audits (37):

Visual issue

[aria-*] attributes match their roles

THE ELEMENT PASSED

Each ARIA `role` supports a specific subset of `aria-*` attributes. Mismatching these invalidates the `aria-*` attributes.

Visual issue

[aria-hidden="true"] is not present on the document <body>

THE ELEMENT PASSED

Assistive technologies, like screen readers, work inconsistently when `aria-hidden="true"` is set on the document <body>.

Visual issue

[aria-hidden="true"] elements do not contain focusable descendants

THE ELEMENT PASSED

Focusable descendants within an [aria-hidden="true"] element prevent those interactive elements

from being available to users of assistive technologies like screen readers.

Visual issue

[role]s have all required [aria-*) attributes

THE ELEMENT PASSED

Some ARIA roles have required attributes that describe the state of the element to screen readers.

Visual issue

Elements with an ARIA [role] that require children to contain a specific [role] have all required children.

THE ELEMENT PASSED

Some ARIA parent roles must contain specific child roles to perform their intended accessibility functions.

Visual issue

[role]s are contained by their required parent element

THE ELEMENT PASSED

Some ARIA child roles must be contained by specific parent roles to properly perform their intended accessibility functions.

Visual issue

[role] values are valid

THE ELEMENT PASSED

ARIA roles must have valid values in order to perform their intended accessibility functions.

Visual issue

[aria-*] attributes have valid values

THE ELEMENT PASSED

Assistive technologies, like screen readers, can't interpret ARIA attributes with invalid values.

Visual issue

[aria-*] attributes are valid and not misspelled

THE ELEMENT PASSED

Assistive technologies, like screen readers, can't interpret ARIA attributes with invalid names.

Visual & motor

The page contains a heading, skip link, or landmark region

THE ELEMENT PASSED

Adding ways to bypass repetitive content lets keyboard users navigate the page more efficiently.

Visual issue

Document has a <title> element

THE ELEMENT PASSED

The title gives screen reader users an overview of the page, and search engine users rely on it heavily to determine if a page is relevant to their search.

Visual issue

[id] attributes on active, focusable elements are unique

THE ELEMENT PASSED

All focusable elements must have a unique `id` to ensure that they're visible to assistive technologies.

Visual issue

ARIA IDs are unique

THE ELEMENT PASSED

The value of an ARIA ID must be unique to prevent other instances from being overlooked by assistive technologies.

Visual & motor

<frame> or <iframe> elements have a title

THE ELEMENT PASSED

Screen reader users rely on frame titles to describe the contents of frames.

Visual issue

<html> element has a [lang] attribute

THE ELEMENT PASSED

If a page doesn't specify a lang attribute, a screen reader assumes that the page is in the default language that the user chose when setting up the screen reader. If the page isn't actually in the default language, then the screen reader might not announce the page's text correctly.

Visual issue

<html> element has a valid value for its [lang] attribute

THE ELEMENT PASSED

Specifying a valid [BCP 47 language]

Visual issue

Lists contain only elements and script supporting elements (<script> and <template>).

THE ELEMENT PASSED

Screen readers have a specific way of announcing lists. Ensuring proper list structure aids screen reader output.

Visual issue

List items () are contained within or parent elements

THE ELEMENT PASSED

Screen readers require list items

Visual issue

No element has a [tabindex] value greater than 0

THE ELEMENT PASSED

A value greater than 0 implies an explicit navigation ordering. Although technically valid, this often creates frustrating experiences for users who rely on assistive technologies.

Cognitive issue

Buttons do not have an accessible name

THE ELEMENT PASSED

When a button doesn't have an accessible name, screen readers announce it as "button", making it unusable for users who rely on screen readers.

Visual issue

Background and foreground colors do not have a sufficient contrast ratio.

THE ELEMENT PASSED

Low-contrast text is difficult or impossible for many users to read.

Visual issue

Heading elements are not in a sequentially-descending order

THE ELEMENT PASSED

Properly ordered headings that do not skip levels convey the semantic structure of the page, making it easier to navigate and understand when using assistive technologies.

Visual & motor

Image elements do not have [alt] attributes

THE ELEMENT PASSED

Informative elements should aim for short, descriptive alternate text. Decorative elements can be ignored with an empty alt attribute.

Visual issue

Links do not have a discernible name

THE ELEMENT PASSED

Link text (and alternate text for images, when used as link(s) that is discernible, unique, and focusable improves the navigation experience for screen reader users.

Visual issue

[user-scalable="no"] is used in the <meta name="viewport"> element or the [maximum-scale] attribute is less than 5.

THE ELEMENT PASSED

Disabling zooming is problematic for users with low vision who rely on screen magnification to properly see the contents of a web page.

Visual issue

ARIA input fields have accessible names

THE ELEMENT PASSED

When an input field doesn't have an accessible name, screen readers announce it with a generic name, making it unusable for users who rely on screen readers.

Visual issue

`<dl>`'s contain only properly-ordered `<dt>` and `<dd>` groups, `<script>`, `<template>` or `<div>` elements.

THE ELEMENT PASSED

When definition lists are not properly marked up, screen readers may produce confusing or inaccurate output.

Visual issue

Definition list items are wrapped in `<dl>` elements

THE ELEMENT PASSED

Definition list items (`<dt>` and `<dd>`) must be wrapped in a parent `<dl>` element to ensure that screen readers can properly announce them.

Visual issue

No form fields have multiple labels

THE ELEMENT PASSED

Form fields with multiple labels can be confusingly announced by assistive technologies like

screen readers which use either the first, the last, or all of the labels.

Visual issue

`<input type="image">` elements have [alt] text

THE ELEMENT PASSED

When an image is being used as an `<input>` button, providing alternative text can help screen reader users understand the purpose of the button.

Visual issue

Presentational `<table>` elements avoid using `<th>`, `<caption>` or the [summary] attribute.

THE ELEMENT PASSED

A table being used for layout purposes should not include data elements, such as the `th` or `caption` elements or the summary attribute, because this can create a confusing experience for screen reader users.

Visual issue

The document does not use `<meta http-equiv="refresh">`

THE ELEMENT PASSED

Users do not expect a page to refresh automatically, and doing so will move focus back to the top of the page. This may create a frustrating or confusing experience.

Visual issue

Cells in a `<table>` element that use the `[headers]` attribute refer to table cells within the same table.

THE ELEMENT PASSED

Screen readers have features to make navigating tables easier. Ensuring `<td>` cells using the `[headers]` attribute only refer to other cells in the same table may improve the experience for screen reader users.

Visual issue

`<th>` elements and elements with `[role="columnheader"/"rowheader"]` have data cells they describe.

THE ELEMENT PASSED

Screen readers have features to make navigating tables easier. Ensuring table headers always refer to some set of cells may improve the experience for screen reader users.

Visual issue

`[lang]` attributes have a valid value

THE ELEMENT PASSED

Specifying a valid [BCP 47 language](<https://www.w3.org/International/questions/qa-choosing-language-tags#question>) on elements helps ensure that text is pronounced correctly by a screen reader.

Visual issue

`<video>` elements contain a `<track>` element with `[kind="captions"]`

THE ELEMENT PASSED

When a video provides a caption it is easier for deaf and hearing impaired users to access its information.

Visual issue

<video> elements contain a <track> element with [kind="text description"]

THE ELEMENT PASSED

Audio descriptions provide relevant information for videos that dialogue cannot, such as facial expressions and scenes.
